PROFESSIONAL SUMMARY

Third-year B.Tech IT student with a strong interest in Java backend development. Familiar with core Java, data structures and algorithms, and building REST APIs using Spring Boot with PostgreSQL. Comfortable working with Git/GitHub and looking for an internship to apply and strengthen these skills in a real-world backend project.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Problem Solving

Backend / Web: Spring Boot, REST APIs, JDBC, HTML, CSS

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman, Android Studio, Jupyter/Anaconda

Python / Data: NumPy, Pandas

PROJECTS

Campus Placement System | *Java, Spring Boot, REST APIs, PostgreSQL, JPA/Hibernate, Postman*

- Built REST APIs for managing students, companies, and placement drives using Spring Boot
- Implemented student eligibility checks based on CGPA and active backlogs, and added functionality for students to apply to placement drives
- Used JPA/Hibernate for database operations with PostgreSQL and added basic error handling for missing resources
- Tested REST endpoints using Postman during development

Student Performance Predictor | *Python, Pandas, NumPy, Scikit-learn, Flask*

- Preprocessed academic data (handling missing values and feature selection) to prepare it for model training
- Trained a machine learning model using Scikit-learn to predict student performance based on academic inputs
- Built a basic Flask interface/API to take input and return predictions

SMS Spam Classifier | *Python, Pandas, NLTK, Scikit-learn, Flask*

- Applied text preprocessing and basic NLP techniques (tokenization, stopword removal) on SMS message data
- Trained a classification model using Scikit-learn to distinguish spam from legitimate messages
- Created a simple Flask-based interface to classify new messages

AttendEase | *Kotlin, Android Studio, Room Database*

- Developed an Android application to manage student attendance records with a simple UI
- Used Room database for local storage of attendance data
- Implemented basic functionality to add, view, and update attendance entries

Personal AI Life Assistant | *Node.js, Express.js, JavaScript, IBM watsonx*

- Built a personal assistant web application using Node.js and Express.js
- Integrated IBM watsonx for AI-related response generation

EDUCATION

B.Tech in Information Technology — CGPA: 8.32

B.K. Birla Institute of Engineering & Technology (BKBIET), Pilani, Rajasthan | 3rd Year, Expected Graduation: 2028

RELEVANT COURSEWORK

Programming in Java & Python, Data Structures, Object-Oriented Programming, DBMS, MySQL

INTERESTS

Software Development, Java Development, Programming & Problem Solving
